1. Introduction

Department of Veterans Affairs (VA) has a need to improve the efficiencies of the outpatient medical scheduling processes through improved visibility of information. VA has created a comprehensive scheduling solution to modernize the Veterans Health Information Systems and Technology Architecture (VistA) Scheduling (VS) product.

1.1. Purpose

The purpose of this document is to provide a summary of the enhancements and defect corrections that make up VS Graphical User Interface (GUI) Release 1.7.39.0. The release software package is comprised of the following:

- VS GUI application 1.7.39.0
- VistA M patch SD*5.3*837

1.2. Audience

This document targets the administrators and users of the VistA Scheduling package.

2. This Release

Please see [Features and Functionality](#) for a summary of the enhancements and defect corrections implemented with VS GUI Release 1.7.39.0 and VistA patch SD*5.3*837.

3. Features and Functionality

The following subsections describe the features included in the VS GUI 1.7.39.0 package and VistA patch SD*5.3*837.

Table 1: Enhancements and Defects Fixes

Work Item ID	Summary of Change
VSE-2644	VistA: SDEC APPSLOTS creates availability where none has been defined
VSE-4689	GUI passing stale parameter to SDEC CLINSET
VSE-4816	VistA: Contact Attempts do not work with Recalls
VSE-4818	VistA: Modify SDES CREATE APPT REQ
VSE-4589	VistA: Any time VS GUI sends hl7 to update order, first check for lock on the order
VSE-4734	VistA: Rewrite SDECCAP CAN in the SDES menu option
VSE-4765	VS GUI: Support and Implementation for AR Close Responses Containing Locked Notification/Errors
VSE-4782	VistA: Add 3 missing cancellation related fields to SDES GET APPTS BY IEN2
VSE-4815	VistA: Modify SDES GET APPT * to return WALKIN flag
VSE-4833	VistA: Rewrite routine SDES01C to standards
VSE-4860	VistA: Modify SDES GET APPT REQ * and SDES GET RECALLS * RPCs
VSE-4869	VistA: Remove Scheduling Manager from the Links in SDEC settings
VSE-4903	VistA: Create a new RPC to return all clinics for which the new person name is a PROVIDER

Work Item ID	Summary of Change
VSE-4937	VistA: Create a new SDES GET CANCMTS to return both national and local comments
VSE-4949	VistA: Modify SDES CREATE APPT REQ RPC and SDES CREATE APPOINTMENT to correct saving child MRTC requests

3.1. Enhancements Implemented and Defects Fixes

Table 1 lists the enhancements implemented and defects corrected in VS GUI Release 1.7.39.0 and VistA patch SD*5.3*837. The work item ID is the Jira issue number.

4. User Documentation

The documentation distributed with VS GUI Release 1.7.39.0 is available for download from the VA Software Document Library (VDL).

5. Known Issues

All known issues resolved by this release were documented in ServiceNow tickets and/or Jira issues as part of the ongoing, post-warranty, sustainment effort. Appropriate issues, workarounds, and step by step resolutions are documented in Knowledge Base articles and included in the searchable ServiceNow Knowledge Base hosted by the VA Enterprise Service Desk (ESD).
